Giving Shape to Ideas

bizhub 215

Everything the office needs

Office system bizhub 215

Flexibility without limits

Whatever the needs and wants in the office, Konica Minolta offers suitable solutions for every requirement – versatile products for professional office environments. The bizhub 215 takes care of almost any every-day office job, leaving everyone in the team more time for their proper tasks. As a true multifunctional, the bizhub 215 prints and copies with a speed of 21 ppm, scans in colour, and faxes* – all in A4 and A3 size. Thanks to its small footprint, there is room for the compact bizhub 215 even in a crowded office. Simply everything the office needs!

➔ Highly flexible media processing

■ Nothing is more appreciated in the office than an instantly usable MFP – the bizhub 215 ensures this with its flexible paper capacity that can be extended as required to a maximum of 1,350 sheets, avoiding loss of time from frequent interruptions to refill paper. The device can be highly flexible as different media can be stocked in up to five different paper sources, whether plain paper, or thick paper of up to 157g/sqm.

■ While A4 is no doubt the predominant paper size for every-day office jobs, A3 format is often also required to print larger tables or flow charts, or when copying from books or magazines. With the bizhub 215, users enjoy full flexibility and independence, as they can print and copy in A3 as well as A4. The bizhub 215 provides easy single-sided as well as double-sided* printing of documents. Cutting archiving space by 50%, duplex printing equals savings – of paper and thus costs – and helps protect the environment.

➔ Scanning – a strength of the bizhub 215

- Today, the need for archiving documents is important for the modern office. Rather than wasting expensive office space with rows and rows of filing cabinets, it makes more sense to opt for electronic document storage. Most modern applications require digitisation anyway, to allow the easy sharing and distribution of information. In addition, electronic search engines facilitate and speed up the retrieval of documents. To increase the speed further, the bizhub 215 enables the digitisation of large stacks of originals. The bizhub 215 can be equipped with a duplex document feeder*. This scans originals at a speed up to 46 opm and automatically processes double-sided documents. This facility is very convenient and also saves valuable time that users can spend more productively, rather than standing in front of the MFP.
- Scanning in black & white does not do justice to some documents, which is why the bizhub 215 provides colour scanning as standard. Users can for example, scan photos and other documents in colour into their PC and later process the electronic colour documents further with varied applications and in customary formats, such as JPEG, TIFF, PDF. Alternatively scans can be sent directly from the MFP to a predefined email address from the MFP's address book or to a network file. This avoids the time-consuming manual shifting of scanned documents to their destination, leaving users time for more important tasks.
- The bizhub 215's standard Scan-to-USB function is another important feature that enhances user flexibility and convenience: any last-minute requirement for documents or presentations just before a meeting or a business trip can easily be met by scanning the information directly from the bizhub 215 to a USB stick without going via a PC. Users save time and gain independence.

*Optional feature/functionality

➔ Efficient device management

- The standard PageScope NetCare Device Manager software provides comfortable and convenient device management: Counter readings and the system status of connected MFPs can easily be recalled via the network – administrators can call up such data by pressing a single key. With a minimum of effort, this functionality offers instant status updates and full control of all equipment at any time.
- Konica Minolta's CS Remote Care ensures the interactive data exchange between the bizhub 215 and the Konica Minolta's service administration – keeping the bizhub running smoothly and automating the ordering of consumables. This process automation helps to maximise system uptime and noticeably increases the overall productivity. At the same time, it relieves IT administrators and allows them to take care of other jobs.
- The bizhub 215 enables the setup of up to 50 user accounts, providing an easy means of reliably limiting system access only to authorised users. This functionality helps to keep printing costs in check; at the same time, it provides the administrator with real-time monitoring and easy control of the printing and copying costs.

Key features

Key benefits

Paper capacity of max. 1,350 sheets in up to 5 paper trays*

Fewer interruptions to refill paper maximises system availability and productivity; saves time and energy

Colour scanning for versatile digitising and electronic archiving of documents

Saves paper and filing space; facilitates further processing, easy sharing and distribution of information

Duplex ADF* and duplex unit*

Saves time, paper, costs, is easy to use, comfortable and is eco-friendly

Device management software for continuous central monitoring of system status and counters

Ensures maximum system availability e.g. with automated consumables ordering; provides instant overview and control; saves time and enhances convenience

PageScope NetCare Device Manager

- All specifications relating to paper capacity refer to A4-size paper of 80 gsm quality.
- All specifications relating to scanning, copying or printing speeds refer to A4-size paper that is scanned, copied or printed crosswise in multipage, simplex mode.
- The support and availability of the listed specifications and functionalities varies depending on operating systems, applications, network protocols as well as network and system configurations.
- The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (5 % coverage of A4). The actual consumables life will vary depending on the use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.
- Some of the product illustrations contain optional accessories.
- Specifications and accessories are based on the information available at the time of printing and are subject to change without notice.
- Konica Minolta does not warrant that any prices or specifications mentioned will be error-free.
- Microsoft, Windows and the Windows logo are trademarks, or registered trademarks, of Microsoft Corporation in the United States and/or other countries.
- All other brand and product names may be registered trademarks or trademarks of their respective holders and are hereby acknowledged.
